About this document

This Target Market Determination ('TMD') for **Netwealth Index Opportunities Conservative Fund** ('Fund'), is issued by Netwealth Investments Limited ABN 85 090 569 109, AFSL 230975. This TMD seeks to provide distributors with an understanding of the class of consumers for which the Fund has been designed. This document is not a summary of the product features or terms of the Fund. The information in this document is general advice only, and the TMD has been prepared without taking into account any persons' objectives, financial situation or needs. Persons interested in acquiring this product should read the Product Disclosure Statement ('PDS') for the Fund before making a decision whether to buy this product.

Important terms used in this TMD are defined in the **TMD Definitions** document which supplement this document. The PDS and the TMD Definitions document can be obtained on our website netwealth.com.au.

Description of target market

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

Generally, a consumer is unlikely to be in the target market for the product if:

- one or more of their Consumer Attributes correspond to a red rating, or
- three or more of their Consumer Attributes correspond to an amber rating.

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (typically with an intended product use of satellite/small allocation or core component). In such circumstances, the product should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a conservative portfolio with a satellite/small allocation to growth assets. In this case, it may be likely that a product with a High or Very High risk/return profile is consistent with the consumer's objectives for that allocation notwithstanding that the risk/return profile of the consumer as a whole is Low or Medium. In making this assessment, distributors should consider all features of a product (including its key attributes).

Consumer attributes

Target market summary

This product is likely to be appropriate for a consumer seeking **capital preservation**. The Fund is designed to be used generally as a **core component** within a portfolio where the consumer has a **medium** investment timeframe and **medium** risk/return profile.

Consumer's investment objective	TMD Indicator	Product description including key attributes
Capital Growth	●	The Fund's investment strategy is to provide investors with attractive returns over the long term through a diversified portfolio with the long-term average allocation of approximately 70% income and 30% growth assets.
Capital Preservation	●	
Capital Guaranteed	●	
Regular Income	●	The investment return objective of the Fund is to outperform the benchmark after fees when measured over rolling five-year periods.
Consumer's intended product use	TMD Indicator	Product description including key attributes
Solution/Standalone (75-100%)	●	The Fund has high portfolio diversification across multiple asset classes, investment strategies, investment managers and styles.
Core Component (25-75%)	●	
Satellite/small allocation (<25%)	●	
Consumer's investment timeframe	TMD Indicator	Product description including key attributes
Short (≤ 2 years)	●	The Fund is managed with an investment time horizon of 5 years or more and may suffer shorter term downturns.
Medium (> 2 years)	●	
Long (> 8 years)	●	
Consumer's Risk (ability to bear loss) and Return profile	TMD Indicator	Product description including key attributes
Very high	●	Netwealth estimates negative annual returns in 2 – 3 years out of every 20 years.
High	●	
Medium	●	
Low	●	

Consumer's need to withdraw money	TMD Indicator	Product description including key attributes
Daily	●	Under normal circumstances, withdrawal requests may be made on any business day and normally processed from the Fund to a platform cash account within three business days from receipt of a withdrawal request.
Weekly	●	
Monthly	●	In the event that most of the Fund's investment in an Underlying Fund or Underlying Funds cannot be withdrawn, there would be a freeze on withdrawals from the Fund and the ability to withdraw within the usual period would be suspended. Given the nature of the investments, this is unlikely to occur except in very unusual circumstances.
Quarterly	●	
Annually or longer	●	

Appropriateness

Netwealth has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market. Netwealth has formed this view as the features of this product in the 'Product description including key attributes' sections are likely to be suitable for consumers with the attributes identified with a green TMD Indicator.

Distribution conditions/restrictions:

All prospective consumers must receive the Product Disclosure Statement in Australia.
